Vol. 33.

## Southeast News.

A man in Warrensburg, Mo., played in good luck. He crawled through a fence, dragged his loaded gun after him and escaped with the loss of one ear—Parma Victor.

Ironton Register

Dr. W. J. Smith has on view several ears of corn grown this season on the old fort field at Pilot Knob. The cereal is of the variety known as White Wonder. It is as fine corn as one could wish, the grain large and plump. He raised 225 bushel on four acres of ground—not bad for a drouthy year.

The old wooden mills building at Cape Girardeau, which had been used some time as an automobile garage, by Hope & Cottier, agents for the Ford cars, was destroyed by fire last Saturday evening, together with ten automobiles. The building was a total loss and the automobile company is said to have lost \$5,000.

Exchanges

A casket quadruple sized was required for the body of John B. Lynch who died in St. Louis last Saturday of fatty degeneration of the heart. He weighed 792 pounds. Despite his weight he wore No. 4 shoes and had hands the size of a woman's. He was a clerk of the Wells Fargo company and was 48 years old.

Elkhorn Press

Wm. Williams killed a pelican in Logan creek one day last week. It was the largest bird of that species we have ever seen, measuring eight feet from tip to tip. It stood five feet in its stock feet and its bill looked like an old fashioned umbrella. The Press scribe sent it to St. Louis to have it mounted and in the future it may be seen in the bay window of our sanctum where any paid up subscriber will be permitted to gaze at it to his heart's content.

Cape Girardeau Republican

Suit was filed at Benton, Tuesday afternoon against Mr. and Mrs. J. P. Lagriner of Illinois for \$20,000. That amount is asked by Adolph Seabough of this city who asserts that he was injured seriously last summer as a result of carelessness on the part of the defendants who were driving in their automobile on the rock road south of the city. Seabough says that he was thrown from his wagon when his horses were frightened and that he received the injuries to his spine as a result. Attorney Ed. Deen filed the suit and it will be heard at the next term of court if it is taken up in regular course.

Greencastle Journal

We assure that drunkenness is more prevalent in Greenville now than it has been since the days of the saloons. Anyway, the disease is more common than it has been for the last six years. Many pedestrians on our main thoroughfare were annoyed or amused according to their dispositions, Saturday night, by the boisterous antics cut by John Barleycorn through the agency of some of our local talent. For a young girl or woman to go unprotected through the streets at any hour without fear of affright or insult is not too much to expect for Greenville. But under existing conditions the attempt would hardly be advisable.

R. L. Tisdale, formerly a farmer and of recent months a real estate dealer with an office in Harrisburg, was found dead, hanging from the limb of a tree in Chaffee early this morning. The coroner's jury's verdict was that Tisdale came to his death at the hands of others than himself and is the general belief that he was first murdered and then hung to the tree for the purpose of hiding the crime. A lack of any houses on his property seems to contradict such a theory but other evidence would in-

Marble Hill, Missouri, Thursday, October 9, 1913.

No. 23.

## The History of Growth Is a History of Pleased Patrons, Prosperity and Stability.

With pardonable pride we call attention to our  
deposits on the FIRST DAY OF OCTOBER for the  
past three years.

1911	\$39,552.36
1912	\$47,304.65
1913	\$55,358.95

Money deposited in this Bank is protected from  
loss, burglary, robbery and fire, by a policy issued  
through the Missouri Bankers Association.

The Resources of this Bank are about SEVENTY-  
FIVE THOUSAND DOLLARS.

THE BANK OF MARBLE HILL IS INDEBTED TO ITS  
GOOD FRIENDS AND CUSTOMERS FOR THIS SHOWING.

dicate that he could hardly leave company, says that the ore tested him himself. As the body swung very high, far in excess of the requirements of a short rope-knotted requirement of the furnace company, under one ear a stiff derby hat held Robert Hall, formerly assistant supervisor on his head, which only prevented the Smuggler mine who viewed the body thought would fit Aspen, Colo., at our time the have been impossible. It is the largest producing silver mine in the world, has been secured to superintend of the tree and swing from the rope, and the mining operations here, the hat would have been destroyed. Work will begin at once at the Saw and fallen to the ground. The above silver mines and other mines will be opened as soon as men and equipment can be secured.

### Confederates Pensioned

Six hundred and fifty-three Confederate veterans will begin to draw pensions of \$10 a month October 1.

Virgil McKay who was pensioned from the state of Missouri four with a company which drilled a well more than 90 years old, 17 are at Clarkton, in an effort to find oil more than \$5,50 over \$0 and \$441 and gas, gave us the following, as are between the ages of 70 and 80.

Formation concerning underground. The pension fund was provided by southeast Missouri. The formation in proportion of \$30,000 made by of the earth, after passing through the late legislature. The pension fund was quicksand for the period until January 1, 1915, on the 300 feet. At that depth a well, less another appropriation is made defined bed of coal was encountered at the next session of the legislature, but not in paying quantities. As Adjutant General O'Meara reports 600 feet a fine artesian flow was due that 1442 applications for pensions covered which they had to issue off have been made. Of these, 894 under the bed of coal at 300 feet, have been emerald green, and 518 a bed of slate, probably 100 feet in the yet to be considered. The War darkness was found and below this department that 152 of the applica-

for several hundred feet the drifts have no record of service on passed thru a bed of white shaly illite have been classed as desert substance. At 1200 feet there was 100, 17 were disapproved, and 26 a bed of pure white sand filled with water and ready for further consideration.

### Jefferson City Correspondence

The state democratic administration stands for better schools and better roads. Two-party goodplanks to go before the people upon, thank you.

A few years ago the republicans charged that the democratic party was a party of obstructionists, that it had no cohesive qualities that it could not carry any issue to a successful conclusion. But all of that prophecy has been doubly discredited now. The democratic party that goes along, that is in reality

reality its platform innocuous, and the republican party is the party of obstructionists. The only party that burns the elephant down now is its publick slaves.

As we understand it, the new currency law proposes to take the control of the money of the United States out of the hands of the stock gamblers of New York and place it in the hands of the government. At that time he said that should the local ore attain a certain smelting test his company could handle a large quantity of it. He took several specimens of ore with him and this week Mr. R. A. Laird, who is in charge of the Wayne Iron & Lumber

order panel in order to force congress to do the bidding of the money changers of Wall street. If the new currency bill becomes a law, when you have money in a bank you can always get it when you want it.

The progressive party is a bit

about lying down with the republican party in the political picture next year. It is safe to say that if the two parties get together, the voter's purpose will be made of the old elephant.

Governor Nigh was elected for a term of four years and the governor says that he will serve his term out if he lives. That's a pretty good brand of democracy/democracy, thank you.

Mr. Republican, beyond doubt, Democracy is my master for whatever he represents the state, 560,000 votes for United States senator next August the people will elect to the Senate of the greatest good.

There are a hundred articles the Democratized 60,000 from that will be the cause because the democratic party has redeemed its promises and reduced the earth downward, has had its pots and butter and eggs and chickens and cattle and mules and horses and oats and wheat and oats and hay are not of the number.

We have received from Congressman Sydney Anderson, representative who recently resigned from the way and means committee his speech entitled "Why I Resigned." We are nothing for the masses. The glad sun has risen upon us for us. We can afford Mr. Anderson that the public would become more popular with everybody if they would resign more.

The republican members of congress have been protesting against what they are pleased to call "progressive rule." The other day Speaker Clark took the floor and sang their

on the floor after the following

for all "This continual bawl about

the reds is the most

of all nations. It divides the family

upon those most able in bent on it

&lt;p
